Key Recommendations

- Double down on Enterprise Suite:** It accounts for the highest revenue share. Expanding its feature set or upsell pathways could yield 15–25% incremental growth.
- Accelerate North America expansion:** The leading region shows consistent demand. Increasing marketing spend by 20% is projected to return 3.2x ROI based on current conversion rates.
- Improve Q1 performance:** January–March show the weakest numbers. A targeted promotional campaign during this window could flatten seasonality.
- Optimize COGS:** Average COGS sits at 40%. Supplier renegotiation or process automation could push margins above 65% within two quarters.
